Additionally, please indicate if you would like the following services: **PLEASE NOTE THAT IT IS HIGHLY RECOMMENDED FOR ALL PATIENTS 7 YEARS AND OLDER TO HAVE PRE-OPERATIVE BLOOD WORK AND AN IV CATHETER WITH FLUID THERAPY.**

#### BLOOD WORK

Your pet has been presented today for anesthesia in conjunction with dental work. We highly recommend performing a pre-anesthetic blood profile to assess internal organ function prior to the administration of any such drugs, especially for older animals. This will ensure that he is in a low risk category during anesthesia by ruling out any pre-existing internal problems that **may not be evident outwardly**, but could possibly lead to complications. There is an additional \$71.96 fee for these important blood tests. \$59.58 for IV Fluids
